PROFESSIONAL SUMMARY

- Senior Software Developer and Systems Analyst with 14+ years of experience delivering enterprise applications for banking, financial trading, and finance automation across Singapore and APAC.
- Expertise in C#, ASP.NET, VB.NET, .NET Framework, SQL Server, T-SQL, system integration, ETL, APIs, performance optimization, Agile Scrum, Azure DevOps, Git, and full SDLC. Proven experience developing mission-critical systems, optimizing databases, automating business processes, and collaborating with cross-functional stakeholders in regulated financial environments.
- Currently completing a Master of Software Engineering in Auckland, New Zealand. Seeking full-time Software Engineer, Senior Developer, or Solutions Engineer opportunities from November 2026 upon receiving a 3-year Post-Study Work Visa.

KEY CAREER ACHIEVEMENTS

- Developed and maintained real-time trading risk systems using C#, ASP.NET, and SQL Server for financial markets.
- Built enterprise data integration and ETL solutions using Markit EDM and SQL Server for investment and asset management.
- Optimised SQL Server performance through query tuning, indexing, and execution plan analysis.
- Automated financial reporting and business processes using SSRS, Power BI, VBA, and SQL Server.
- Delivered enterprise automation solutions that streamlined reporting, reconciliation, and operational workflows across APAC.

CORE TECHNICAL SKILLS

Programming Languages & Frameworks

C#, .NET Framework, ASP.NET (WebForms, MVC), .NET Core, VB.NET, SQL, Python

Backend & Enterprise Development

FIX API, Windows Services, OOP, Layered Architecture, System Integration, Middleware, Automation

Databases & Data Engineering

Microsoft SQL Server (2008–2022), SSIS, SSRS, SSMS, Power BI, ETL, Markit EDM, Data Migration

Agile, DevOps & Software Delivery

Agile Scrum, Backlog Management, Git, GitHub, Unit Testing, CI/CD, Windows Server, IIS, Cloud Migration, Docker

Tools & Platforms

Visual Studio, JIRA, Confluence, Control-M, VMware, MongoDB

PROFESSIONAL EXPERIENCES

Software Engineering Intern - Master's Industry Project

SOL Edu & Migration, New Zealand

Jul 27, 2026 – Present

- Design and develop SPIMS, translating business requirements into a secure, maintainable web application that centralises programme information and replaces manual Excel-based processes.
- Engineer end-to-end full-stack functionality using Python, Flask, SQLAlchemy, SQLite, HTML, CSS, Bootstrap, and JavaScript, including RBAC, search, dashboards, reporting, and data validation.
- Drive key technical design and engineering activities across application architecture, database design, secure development, testing, debugging, and solution quality throughout the SDLC.
- Collaborate with business and academic stakeholders to translate requirements into solutions, maintain source code using Git/GitHub, and produce technical documentation.

Key Technologies: Python, Flask, SQLite, SQLAlchemy, HTML, CSS, Bootstrap, JavaScript, Chart.js, Pandas, Pytest, Git/GitHub, RBAC, REST/JSON

Senior System/Application Developer Analyst

Rhicon Currency Management Pte Ltd, Singapore

Oct 19, 2020 – Mar 24, 2025

- Developed and enhanced real-time trading and risk management systems using C#, ASP.NET, SQL Server, and FIX API.
- Delivered end-to-end software solutions by collaborating with business stakeholders, traders, and operations teams.
- Optimized SQL Server performance through query tuning, indexing, and execution plan analysis, improving system efficiency.
- Integrated market data APIs and automated trade reconciliation and regulatory reporting (SSRS) to streamline operations and ensure compliance.
- Built monitoring and alerting tools, improving application reliability and production support.
- Managed end-to-end application development using Agile principles, overseeing backlog management, version control (Git), testing, release delivery, and production support.

- Supported enterprise applications, APIs, deployments, and production systems in a high-availability financial trading environment.

Projects:

- Trading Risk Viewer System** - Enhanced portfolio and risk management system built with C#, ASP.NET, MS SQL.
- MAS Regulatory Reporting Automation** - Developed reporting solutions to comply with **Monetary Authority of Singapore** derivatives regulations.
- Trading Closeout/Rolls Automation** - Built automated alerts and reporting tools for trade settlement and cash flow monitoring.

Key Technologies: C#, ASP.NET 4.5, MS SQL Server, MongoDB, SSRS, FIX API, Windows Services, Git, JIRA

Senior Application/ CADIS (Markit EDM) Developer

UOB - United Overseas Bank, Singapore via Randstad Technologies **July 05, 2017 – July 09, 2020**

- Built enterprise data pipelines using Markit EDM, SQL Server, and ETL workflows, enabling automated processing of financial datasets including Prices, Holdings, Securities, and Benchmarks for asset management systems.
- Developed ABOR/IBOR data integration solutions using Markit EDM and SQL Server, improving financial data availability and supporting portfolio reporting and analytics for asset management teams.
- Optimized SQL Server queries, stored procedures, and database schemas, improving performance of financial data processing and reporting systems.
- Automated financial reporting and tax workflows using VBA, SQL Server, and ASP.NET, eliminating manual processes for IRS Form 1042 reporting and improving reporting efficiency for finance teams.
- Delivered the UOB Asset Management FactSet rollout across Thailand, Taiwan, and Malaysia, supporting regional asset management operations.

Key Technologies: Markit EDM (CADIS), C#, MS SQL Server, SSIS, ETL, Stored Procedures, Performance Tuning, Control M, Batch Scripting

Senior Systems Analyst

Unilever Asia Private Ltd, Singapore via Randstad Technologies **Jun 11, 2015 – Jun 30, 2017**

- Developed SQL Server & VBA automation solutions that streamlined finance operations and reporting across 7 countries.
- Built SQL Server databases, T-SQL, SSRS reports, and ETL solutions to improve reporting efficiency and business processes.

Key Technologies: Excel VBA, Microsoft SQL Server, T-SQL, SSRS, SSMS, Database, ETL, Performance Tuning

EARLY CAREER EXPERIENCE (2008 – 2015)

Software Engineer / Application Consultant

Philippines & Singapore

- Developed backend enterprise systems for banking, HR, finance, and telecom clients.
- Built applications using C#, ASP.NET (1.1–3.4), VB.NET, SQL Server.
- Designed SSIS packages, SSRS reports, ETL jobs, and automation tools.
- Supported production systems in regulated financial environments.

Key Technologies:

C#, ASP.NET (1.1–4.5), VB.NET, VB6, SQL Server, SSIS, AJAX, Excel VBA, SharePoint, ETL, BCP, HTML, CSS, JSON

NZ ACADEMIC PROJECT EXPERIENCE (2025–Present)

- Developed Python AI applications and Django web systems using OOP, layered architecture, and modular design.
- Applied Agile Scrum, Git, clean code principles, and software engineering best practices throughout the SDLC.

WORK ELIGIBILITY - NEW ZEALAND

- NZ based, Eligible for a **3-year Post-Study Work Visa** & unrestricted full-time employment from November 2026.

EDUCATION

Master of Software Engineering (In Progress) - Nov 2025 to Nov 2026
Yoobee College of Creative Innovation, Auckland, New Zealand

Bachelor of Science in Computer Engineering (June 2003 to March 2008)
Polytechnic University of the Philippines - Sta. Mesa Manila, Philippines

CERTIFICATIONS

- Markit EDM Certified Developer | Microsoft Certified IT Professional (MCITP) | Microsoft Certified Technology Specialist (MCTS): SQL Server Database Development
