PROFESSIONAL SUMMARY

- **Senior Software Engineer with 14+ years of experience building enterprise and financial systems using C#, .NET, and SQL Server across banking and financial services environments.**
- **Delivered end-to-end SDLC execution** including architecture design, backend development, database optimization, testing, deployment, and production support for mission-critical applications.
- **Engineered scalable backend and data solutions using SQL Server, ETL pipelines, API integrations, and object-oriented design**, improving performance, automation, and operational efficiency.
- **Certified Markit EDM Developer with strong experience in enterprise data management and financial data platforms**, complemented by modern development projects using **Python, Django, and Docker** to build scalable web applications and cloud-ready systems.

KEY CAREER ACHIEVEMENTS

- **Architected and maintained a real-time trading risk platform using C#, ASP.NET, and SQL Server**, supporting live trading operations and portfolio monitoring for financial markets.
- **Delivered enterprise financial data pipelines using Markit EDM and SQL Server**, enabling automated data processing and investment reporting across asset management platforms at UOB.
- **Optimized SQL Server database performance through query tuning, indexing, and execution plan analysis**, improving processing speed and reliability of enterprise financial systems.
- **Automated financial reporting and operational workflows using SSRS, VBA, and SQL Server**, reducing manual processes and improving reporting efficiency for finance and trading teams.
- **Developed enterprise automation solutions for Unilever finance operations using VBA and SQL Server**, streamlining reporting, reconciliation, and financial analytics across multiple APAC markets.

CORE TECHNICAL SKILLS

Programming Languages: C#, ASP.NET, Python, SQL, VBA, VB.NET, VB6, JavaScript, CSS, AJAX, XML, JSON
Platforms: ASP.Net, .Net, IIS, VSS/TFS, SSIS, SSRS, Markit EDM, MS Visual Studio, MS Office, Windows Server
Databases: Microsoft SQL Server 2003-2022, MongoDB, Query Optimization, Indexing, Performance Tuning
Other Skills: Gitlab, JIRA, PowerShell, Control-M, Batch Scripting, Computer troubleshooting, Basic Networking

PROFESSIONAL EXPERIENCES

Senior System/Application Developer

Rhicon Currency Management Pte Ltd, Singapore

Oct 19, 2020 – March 24, 2025

- Architected and maintained a **real-time trading risk management system** using **C#, ASP.NET, and SQL Server**, supporting daily trading operations and portfolio monitoring for traders and operations teams.
- Led end-to-end development of trading system enhancements in collaboration with the **COO, traders, and back-office teams**, translating business requirements into reliable technical solutions.
- Designed and delivered **financial system improvements and automation tools**, increasing operational efficiency and improving internal trading workflows.
- Optimized **SQL Server database performance** by tuning complex queries, analysing execution plans, and improving indexing strategies, significantly improving data processing speed and system throughput.
- Integrated **market data APIs and price feed services** into trading platforms to enable accurate real-time pricing, trade validation, and portfolio valuation.
- Built automated **trade reconciliation and regulatory reporting solutions using SSRS**, reducing manual processes and improving reporting accuracy for management and compliance teams.
- Developed **monitoring and alerting tools** for trading infrastructure to detect system failures and performance issues, improving system reliability and operational visibility.
- Implemented **source control and issue tracking workflows using Git and JIRA**, improving development collaboration, change management, and release tracking.
- Managed internal **applications, APIs, and trading support systems**, coordinating with infrastructure teams and external vendors for server maintenance, deployments, and system upgrades.

Projects:

- **Trading Risk Viewer System** - Enhanced portfolio and risk management system built with C#, ASP.NET, MS SQL.
- **MAS Regulatory Reporting Automation** - Developed reporting solutions to comply with Singapore MAS derivatives regulations.
- **Trading Closeout/Rolls Automation** - Built automated alerts and reporting tools for trade settlement and cash flow monitoring.

Key Technologies: C#, ASP.NET 4.5, MS SQL Server, MongoDB, SSRS, FIX API, Windows Services, Git, JIRA

Senior Application / CADIS Developer

UOB - United Overseas Bank, Singapore via Randstad Technologies July 05, 2017 – July 09, 2020

- **Built enterprise data pipelines using Markit EDM, SQL Server, and ETL workflows**, enabling automated processing of financial datasets including **Prices, Holdings, Securities, and Benchmarks** for asset management systems.
- **Developed ABOR/IBOR data integration solutions using Markit EDM and SQL Server**, improving financial data availability and supporting portfolio reporting and analytics for asset management teams.
- **Optimized SQL Server queries, stored procedures, and database schemas**, improving performance of financial data processing and reporting systems.
- **Automated financial reporting and tax workflows using VBA, SQL Server, and ASP.NET**, eliminating manual processes for **IRS Form 1042 reporting** and improving reporting efficiency for finance teams.
- **Delivered the UOB Asset Management FactSet rollout across Thailand, Taiwan, and Malaysia**, implementing EDM data loads, exports, and reporting solutions to support regional investment operations.

Key Technologies: Markit EDM (CADIS), C#, MS SQL Server, SSIS, ETL, Stored Procedures, Performance Tuning, Control M, Batch Scripting

Senior Systems Analyst

Unilever Asia Private Ltd, Singapore via Randstad Technologies Jun 11, 2015 – Jun 30, 2017

- **Developed finance automation platforms using VBA and SQL Server**, replacing manual financial reporting workflows and improving operational efficiency for regional finance teams.
- **Designed and optimized SQL Server databases, stored procedures, and reporting queries**, enabling faster financial analysis and improved data reliability across finance operations.
- **Built automated financial analytics tools for gross margin analysis and expense reporting**, significantly reducing manual report preparation for finance leadership.
- **Led development of enterprise finance automation systems including Employee DataMart and reconciliation tools**, improving data visibility across HR and finance operations in multiple countries.
- **Automated reconciliation and financial accrual processes using SQL Server and VBA**, reducing processing time from several days to significantly faster reporting cycles across **seven APAC markets**.

Key Technologies: Excel VBA, Microsoft SQL Server, T-SQL, SSRS, SSMS, Database , ETL, Performance Tuning

Early Career Experience (2008 – 2015)

Software Engineer / Application Consultant - Philippines & Singapore

- **Developed enterprise web applications and backend systems using C#, ASP.NET, SQL Server, and SSRS**, supporting HR, financial reporting, and telecom platforms used across regional organizations.
- **Built the LEAD e-learning platform modules using C#, ASP.NET, HTML, CSS, AJAX, and XML**, delivering teacher and student tracking features and improving interactive learning capabilities for the MCOOnline system.
- **Engineered financial automation solutions using VBA and SQL Server for Unilever**, replacing manual processes in supply chain finance and enabling automated reporting for tax, transfer pricing, and financial analysis.
- **Developed the Financial Capital (FinCap) FX Risk module for DBS Bank using C#, ASP.NET, SSIS, and SSRS**, enabling automated ETL workflows and reporting for financial risk management systems.
- **Designed and optimized SQL Server databases, stored procedures, and reporting pipelines**, improving performance and reliability of enterprise HR and finance applications.
- **Built enterprise HR and finance systems including HRIS modules, benefits platforms, and reconciliation tools**, supporting payroll, employee benefits, and financial reporting workflows.
- **Developed SMS-based web applications using C# ASP.NET and SQL Server**, enabling automated telecom messaging platforms used in marketing and subscriber services.

Key Technologies:
C#, ASP.NET, VB.NET, VB6, SQL Server, SSIS, AJAX, Excel VBA, SharePoint, ETL, BCP, HTML, CSS, JSON

EDUCATION

Master of Software Engineering (In Progress) - Nov 2025 to Nov 2026
Yoobee College of Creative Innovation, Auckland, New Zealand

Bachelor of Science in Computer Engineering (June 2003 to March 2008)
Polytechnic University of the Philippines - Sta. Mesa Manila, Philippines

CERTIFICATIONS/ACHIEVEMENTS

Markit EDM Certified – User Interface and Markit EDM Introduction Exam in February 2019
Microsoft Certified IT Professional (MCITP): Database Developer 2008 in February 28, 2011
Microsoft Certified Technology Specialist (MCTS): SQL Server 2008, Database Development in January 28, 2011
